

ImPACT Baseline Concussion Test

About Baseline Testing: The baseline test is an important tool used to diagnose a concussion or evaluate when it is safe for an athlete to return to a sport after suffering a concussion. If a concussion or possible concussion is sustained, it is likely that a post injury test will be administered at that time.

Instructions for Baseline Testing:

Allow for 30-40 minutes in a quiet and distraction free environment.

*No cellphones, TV, music, or other disturbances

Try to use a computer with a mouse rather than a touch pad if possible

Go to the website www.impacttestonline.com/schools

Select New Jersey from the dropdown box and click “Launch Baseline Test”

Enter the code: B8AC4DCF8C

While holding down the control key, hit “Launch Baseline Test” again

*If test does not launch, then make sure that your pop-up blocker allows pop ups from www.impacttest.com and retry

Fill out the required demographic information

Read all instructions carefully for each step and begin the test when prompted

Please print the test results after the test is completed

The printed confirmation should be submitted to Mr. Matt Bale-Pena, athletic trainer, in person or to his mailbox in the front office.

Contact Mr. Matt Bale-Pena at mbalepena@shsd.org with any questions.
